Career Summary

I am a dedicated civil engineer with over Two year of experience specializing in steel technical office engineering and QC engineering in steel fabrication. I am seeking a challenging opportunity in a reputable company to leverage my skills, experience, and academic background for professional development and to contribute to the company's advancement.

My proven ability to handle engineering tasks encompasses the entire project lifecycle, from design through fabrication and quality control. I am adept at ensuring precision in technical documentation, maintaining rigorous quality standards, and effectively managing project timelines and resources.

I am committed to continuous learning and professional growth, aiming to deliver exceptional results and support the achievement of organizational goals through my expertise in steel fabrication and quality assurance.

Skills

Hard Skills (Core Competencies)

Structural Analysis and Design | Project Management | Construction Supervision | Technical Drawing Interpretation | Site Assessment and Surveying | Material Science | Regulatory Compliance | Cost Estimation and Budgeting | Safety Management | Environmental Impact Assessment

Personal Skills

Analytical Thinking | Problem-solving and effective decision-making | Team Collaboration | Adaptability | Attention to Detail | Leadership Project leadership and team guidance | Time Management | Ethical Conduct Interpersonal Skills | Continuous Learning

Technical Skills

Tekla Structures | AutoCAD (Any version) | STAAD Pro (V. 16.1) | SAP (V. 20, 21, 22) | SAFE (V. 16) | ETABS (V. 20) | Revit (V. 18) | Microsoft Office 365

Languages Skills

Arabic (Mother Tongue) | English (Very good Reading, Writing, and speaking)

Work Experience

Steel Detailer & Steel Fabrication | Adwa' Versay

Jul 2024 – present | Al Kharj, Saudi Arabia

- AI-KHARJ ENTERTAINMENT COMPLEX PROJECT (fabrication and erection of Steel Hunger, Caravan, Administrative Offices, Handrail, Cross Over, Trench's) (on site)
- AI-KAFD PROJECT (fabrication and erection of steel structures Bridge 120-ton Weight – Mobilization & Erection & Finishing)
- AMAALA PROJECT – RED SEA (fabrication and erection of steel structures Canopy 25-ton Weight, Handrail, Trench's)
- GREEN CONCRETE COMPANY PROJECT (Fabrication and Assembly of steel water tanks and Silo (100-ton and 300-ton Capacity)
- KAUST PROJECT (fabrication and erection of Steel Louver, Trench's)
- STEEL DESIGN AND DETALING: Created detailed steel designs and shop drawings for various structural projects.

Utilized design software to develop accurate and precise drawings, ensuring they met project specifications and industry standards.

Modelling and Drafting: Developed 3D models of steel structures using software such as and Tekla Structure and AutoCAD.

Steel Technical Office Engineer | Advanced International Trade Company (AITCO)

Apr 2024 – Jun 2024 | Riyadh, Saudi Arabia

- Prepared and reviewed technical drawings and shop drawings using Tekla Structures, ensuring compliance with project specifications and standards.
- Coordinated with architects, engineers, and stakeholders on design updates and integration.
- Supervised steel fabrication and installation, ensuring quality and adherence to safety and design requirements.
- Managed material selection, procurement, and delivery, maintaining proper inventory and alignment with project timelines.
- Implemented quality assurance processes, conducted inspections, and verified compliance of steel components.
- Maintained documentation and progress reports on design changes, material tests, and project performance.

Junior Steel Designer and Detailer | Engineering Buildings Firm (EBF)

Oct 2023 – Mar 2024 | Cairo, Egypt

- Completion of Design and Fabrication of a 1,000-ton Weight Citrus Sorting Station: Successfully completed the design and fabrication of a large-scale citrus sorting station in the city of Wadi El Natroun.
- Ensured the structural integrity and functionality of the sorting station, which weighs 1,000 tons.
- Completion of Design and Fabrication of a 15-ton Weight Stair: Successfully completed the design and fabrication of a 15-ton stair in the city of El Maadi.
- I ensured the stair met all structural and aesthetic requirements, contributing to the project's success.
- Steel Design and Detailing: Created detailed steel designs and shop drawings for various structural projects.
- Utilized design software to develop accurate and precise drawings, ensuring they met project specifications and industry standards.
- Modelling and Drafting: Developed 3D models of steel structures using software such as AutoCAD and Tekla.
- Generated detailed fabrication and erection drawings, including plans, elevations, sections, and connection details.
- Coordination and Collaboration: Worked closely with senior designers and engineers to understand project requirements and design objectives.
- Coordinated with other disciplines, including architects and MEP engineers, to ensure seamless integration of steel designs.
- Quality Assurance: reviewed and checked drawings for accuracy, completeness, and compliance with design standards.
- Assisted in the preparation of material lists and bills of quantities based on detailed drawings.
- Technical Support: Provided technical support to the fabrication and construction teams, addressing any queries or issues related to the steel designs.

Certificates & Training

- Structural Design Diploma — Comprehensive training in structural design principles and practices.
- Steel Design & Detailing Diploma — Specialized coursework in steel structure design and detailing techniques.

Education

- B.S. Civil Engineering - Structural Engineering Division | Faculty of Engineering, Al-Azhar University

2018 – 2023 | Cairo, Egypt
- Overall Rating: Very Good
 - Graduation Project: Design of Steel Structures
 - Project Grade: Very Good
